TIMELESS DESIGN, ADVANCED PERFORMANCE

ALUCO EXTERIOR STEEL LOOK COLLECTION

The Aluco steel look system uses modern high performing materials to create traditional steel look style doors and windows. Our signature Aluco collection is inspired by traditional, industrial steel windows and the highly sought after Scandi-style.

Combining cutting edge technology with artisan designs and craftsmanship, we create striking but minimalist metal frames, featuring slim sightlines and the iconic grid-like designs, with styles that range from classic heritage to contemporary. These versatile windows and doors have the ability to completely transform your home, letting in more light and creating luxury living spaces whilst still delivering thermal, security and weathering performance.

ALUCO INTERIOR STEEL LOOK COLLECTION

The Aluco interior doors and screens will enhance any home, with classic details like handle back plates, bottom kick plates, slim horizontal and vertical glazing bars, rose back plate handles as well as the bespoke Floating Lock. All these go to provide you with the iconic industrial finish, available as single and double glazed options.

KEY FEATURES

- Eye catching slim sightline design interior doors, screens and partitions
- No need for sanding down and painting due to the system being finished with long lasting powder coat paint
- Authentic design lock housing
- A vast choice of glazing designs including Georgian type grids and a number of obscure glass designs
- 4mm toughened glass comes as standard with the option to upgrade to sound reducing acoustic glass
- You can get creative and choose different glass designs within the one door. For example clear glass at the top and bottom with an obscure glass such as the reeded design in the middle
- Choose between slim door base rail or authentic looking deep bottom rail
- Unique design slim hinges strategically placed for maximum strength and ease of operation
- Anti-rattle mechanism within the lock housing
- Doors incorporating transoms feature chic slim sightline to maximise light ingress
